- 1. Download PuTTY from here
- 2. Turn On the controller and connect to the Solo WiFi

3. Enter "sololink" password

4. Open PuTTY and enter the login information:

Host name: 10.1.1.1Connection type: SSH

- Port number: 22

5. Click "Yes" on the security alert.

6. login as "root".

7. Enter "TjSDBkAu" password.

8. Type "runStickCal.sh" and hit enter. (Note: type "runS" and hit "Tab" to complete the command).

- 9. Move the "sticks" on the controller to their maximum ranges several times until the numbers stop changing on the screen.
- -Both sticks to all 4 corners.
- -Paddle on the top left (hold it up and down several times until you get the vibration).
- -Dial on the top right (move to both extremes several times).

10. Press "Ctrl+c" to complete the calibration and type "exit" to exit the session.
